Professional Summary

Junior Full-Stack and MERN Stack Developer with hands-on experience building responsive React applications, REST APIs, authentication systems, and MongoDB-backed features. Proficient in JavaScript, TypeScript, React.js, Redux Toolkit, Node.js, Express.js, MongoDB, Git, GitHub, and Postman. Data Science graduate with additional experience in Python, Power BI, machine learning, and NLP. Passionate about developing secure, accessible, and user-focused web applications.

Work Experience

MERN Stack Developer Intern

Apr 2026 - Present

App Innovation Technologies Private Limited

- Developed responsive web applications using React.js, Redux Toolkit, JavaScript, HTML5, and CSS3.
- Built RESTful APIs using Node.js and Express.js and managed MongoDB CRUD operations.
- Integrated frontend and backend functionality, including authentication, validation, and protected routes.
- Used Git, GitHub, and Postman for collaboration, API testing, debugging, and performance optimization.

Education

Bachelor of Science in Data Science

May 2023 - Mar 2026

Sri Krishna College of Arts and Science

Completed coursework in data analytics, statistics, machine learning, artificial intelligence, Python programming, database management, and data visualization. Developed practical experience through academic projects involving data preprocessing, exploratory data analysis, predictive modelling, and data-driven insights.

Projects

AquaGuard AI – Full-Stack AI Safety Platform

Apr 2026 - Jun 2026

React.js, TypeScript, FastAPI, MongoDB, Python, YOLO

- Developed a full-stack safety platform that analyzes uploaded videos and live camera streams to identify potentially dangerous aquatic behavior.
- Implemented secure authentication, real-time monitoring, incident management, alerts, and an interactive React dashboard.
- Integrated computer-vision processing using Python and YOLO with a FastAPI backend.

Nexa – Responsive Gaming Web Application

May 2026 - May 2026

React.js, JavaScript, Bootstrap, React Router

- Built a responsive gaming web application using React.js, JavaScript, Bootstrap, and React Router.
- Developed reusable components for game browsing, categories, navigation, and detailed game information.
- Implemented client-side routing to provide smooth navigation without full-page reloads.
- Optimized the interface for consistent performance across desktop, tablet, and mobile devices.

Vogue Vivant – Fashion Web Application

Jun 2026 - Jun 2026

React.js, JavaScript, HTML5, CSS3

- Developed a responsive fashion website with editorial layouts, modern typography, and interactive content.
- Created reusable interface components and optimized the layout for desktop and mobile devices.
- Implemented smooth animations and structured navigation to improve the browsing experience.
- Integrated user authentication, order tracking, and inventory management functionality.

Technical Skills

React.js JavaScript (ES6+) Redux Toolkit HTML5 CSS3 Node.js Express.js MongoDB Mongoose
REST APIs JWT Authentication Bootstrap TypeScript Machine Learning
Power BI (DAX, AI visuals, dashboards) NLP Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn) SQL
Visual Studio Code Git GitHub Postman

Soft Skills

Problem Solving Critical Thinking Team Collaboration Effective Communication Time Management
Adaptability Attention to Detail

Certifications

Python for Beginners

Simplilearn | 2025

ChatGPT for Developers

upGrad | 2025

Power BI for Data Analysis

VOIS | 2025

Cybersecurity Beginner

VOIS | 2025

Achievements

- Published a research paper on deep learning-based financial sentiment analysis in IJSRET.
- Developed and deployed responsive web applications using React.js, TypeScript, and modern frontend technologies.
- Built RESTful APIs and integrated databases for secure, data-driven applications.

Languages

English - Professional proficiency
Malayalam - Native
Tamil - Professional proficiency
French - Beginner

Additional Experience

Data Analyst & Networking

Aug 2023 - Feb 2026

Alert Security Mart
Coimbatore

- Assisted with configuring network infrastructure and server laboratory environments for security-system testing and deployment.
- Supported programmatic testing and validation of secure electronic locking systems.
- Performed basic network troubleshooting and hardware diagnostics to maintain stable laboratory operations.
- Collaborated with engineers to document system configurations and testing procedures.
