Professional Summary

Full-Stack Developer and Data Science graduate with hands-on experience building responsive, scalable, and data-driven web applications using MongoDB, Express.js, React.js, Java and Node.js. Skilled in developing user-friendly interfaces, RESTful APIs, database-driven features, and end-to-end web solutions. Also experienced in Python, Power BI, data analytics, visualization, machine learning, NLP, and AI-powered applications. Certified in Power BI, cybersecurity, cryptography, and ethical hacking, with a passion for combining full-stack development and data science to solve real-world problems.

Work Experience

MERN Stack Developer Intern |

Apr 2026 - Present

App Innovation Technologies Private Limited

- Developed responsive web applications using React.js, Redux, JavaScript, HTML5, and CSS3.
- Built RESTful APIs with Node.js and Express.js and managed MongoDB CRUD operations.
- Integrated frontend and backend features, including authentication, validation, and protected routes.
- Used Git and GitHub for collaboration, testing, debugging, and performance optimization.

Education

Bachelor of Science in Data Science

May 2023 - Mar 2026

Sri Krishna College of Arts and Science

Developing a strong foundation in data analytics, statistics, machine learning, artificial intelligence, Python programming, database management, and data visualization. Gaining practical experience through academic projects involving data collection, preprocessing, exploratory data analysis, predictive modelling, and extracting meaningful insights from complex datasets.

Projects

AquaGuard AI — Full-Stack AI Safety Platform

Apr 2026 - Jun 2026

React.js, TypeScript, FastAPI, MongoDB, Python, YOLO

- Developed a full-stack platform for analysing uploaded videos and live camera streams to detect potentially dangerous aquatic behaviour.
- Built secure user authentication, real-time monitoring, incident management, alerts, and an interactive React dashboard.

Nexa — Responsive Gaming Web Application

May 2026 - May 2026

React.js, JavaScript, Bootstrap, React Router

- Built a responsive gaming website with reusable React components, structured navigation, and interactive user interfaces.
- Used React Router for client-side navigation and Bootstrap to deliver a consistent experience across screen sizes.

Vogue Vivant — Fashion Web Application

Jun 2026 - Jun 2026

React.js, JavaScript, HTML5, CSS3

- Developed a responsive fashion website with reusable components, modern layouts, and interactive product displays.
- Created an intuitive user interface and optimized the design for a consistent experience across desktop and mobile devices.

Skills

React.js

JavaScript (ES6+)

Redux Toolkit

HTML5

CSS3

Node.js

Express.js

MongoDB

Mongoose

RESTful APIs

JWT Authentication

Bootstrap

Typescript

TypeScript

Machine Learning

Power BI (DAX, AI visuals, dashboards)

NLP

Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn)

SQL

Visual Studio

Git /GitHub /Postman

Soft Skills

Problem-Solving Critical

Critical thinking

Team collaboration

Effective communication

Time management

Adaptability

Attention to detail

Certifications

Python for Beginners

Simplilearn
1782844200000
10365364

ChatGPT for Developers

upGrad
1777573800000

Power BI for Data Analysis

VOIS
1746037800000
1748716200

CYBER SECURITY BEGINER

VOIS

Achievements

- Published a research paper on deep-learning-based financial sentiment analysis in IJSRET.
- Developed and deployed responsive full-stack web applications using React.js and TypeScript.
- Built RESTful APIs and integrated databases for secure, data-driven applications.

Languages

English

Malayalam(Native)

Tamil

French

Internship / Part-Time

Data Analyst & Networking

Aug 2023 - Feb 2026

Alert Security Mart
Coimbatore

Assisted in setting up and confi guring network infrastructure and server lab environments for security system testingand deployment.
Supported programmatic testing and validation of secure electronic locking systems to ensure reliability andcompliance with security standards.
Performed basic network troubleshooting and hardware diagnostics to maintain stable lab operations.
Collaborated with engineers to document system confi gurations and testing procedures.
